

Sprint One Report - Slug Notes - Power Rangers

October 21, 2015

Actions to stop doing:

- We should stop stealing other people's tasks that they were assigned and allow them to finish their work on their own.

Actions to start doing:

- We should start working in the same room so that we can bounce ideas off of each other rather than everyone implement his/her own features.
- We should start keeping a more precise burnup chart so we can ensure that everyone is on track for the sprint.
- We should start sending reminders of meetings in order to assure everyone will be present.
- We should start skyping in to a meeting if you are unable to make it to campus.

Actions to keep doing:

- We should keep helping each other when we are stuck on certain tasks.
- We should keep on touching base by using the google chat app.

Work completed/not completed:

Completed user stories:

- I as a team member would like to easily share code and work on the project in order to get an A in the class. (This would imply setting up GitHub and Django).
- I as a user would like to be able to create and log into an account in order to be able to have my own unique profile.
- I as a user would like to be able to store my information (flash cards and personal profile) on my own account in order to be able to access my notes when I need them most. (Here we would setup the database)

Uncompleted user stories:

None :)

Work completion rate:

Data Used to Compute Rates:

3 User Stories/Sprint

25 Ideal Work Hours/Sprint

17 Days/Sprint

Rates for This Sprint:

User Stories/Day = $3/17 = .1765$

Ideal Work Hours/Day = $25/17 = 1.47$

Average Rates: (since this is the first sprint, the average rates are the same as the calculated rates)

User Stories/Day = .1765

Ideal Work Hours/Day = 1.47
