

Sprint Three Plan - Slug Notes - Power Rangers

Sprint Three Completion Date: November 25, 2015

Revision Number: #1

Revision Date: November 6, 2015

Sprint Two Goal:

Be able to study and share flashcards, and have the ability to search the website.

User Story 1: I as a user would like to be able to study a deck of flashcards in order to study for a class

Tasks:

- On study mode click per deck, go to another page that will display a single card and have the ability to turn the card over (Time Estimate: 5 hours)
- Be able to move to the next/previous card of a deck that you are studying (Time Estimate: 4 hour)
- Be able to randomize the order that the cards appear (Time Estimate: 5 hours)

User Story 2: I as a user would like to be able to search for users profiles and shared decks by name in order to find study material associated with a class I'm in.

Tasks:

- Setup a search that checks for decks (that are shared) and users that match the search. Just return the array to the page. (Time Estimate: 8 hours)
- Take the array returned and display a split page, top contains user's returned by the search and the bottom contains decks returned by the search. (Time Estimate: 7 hours)
- Create a public profile page where user's information (username, first and last name) is displayed and all their shared decks are displayed. (Time Estimate: 9 hours)
- Be able to click on a deck in order to study them (ie link user story 2 to user story 1) (Time Estimate: 1 hour)

User Story 3: I as a user would like to be able to copy someone else's public notes so I can modify them and study them myself.

Tasks:

- Grab the deck from the database and copy giving it a new deck id and a new associated user. All cards in the deck should also be copied and change their card id along with the associated deck id (Time Estimate: 8 hours)
- Add button to UI to “copy”, modal giving them the option to change the deck name and toggle share option (should check that the deck name doesn't already exist in current user's deck) and confirmation saying it “Deck was copied”. (Time Estimate: 5 hours)

Team Roles:

Sara Woods (Product Owner):

Study Mode Creator

Alex Janakos:

Database Interactor

Peter Greer (Scrum Master):

User Profile Creator

James Brower:

Card Randomizer

Ethan Vadai (Scrum Master):

Database Interactor

Initial Task Assignment:

Sara Woods (Product Owner):

User Story 1, task 1, task 2

User Story 2, task 2

User Story 3, task 2

Alex Janakos :

User Story 2, task 1

User Story 3, task 1

Peter Greer (Scrum Master):

User Story 2, task 3

James Brower:

User Story 1, task 3

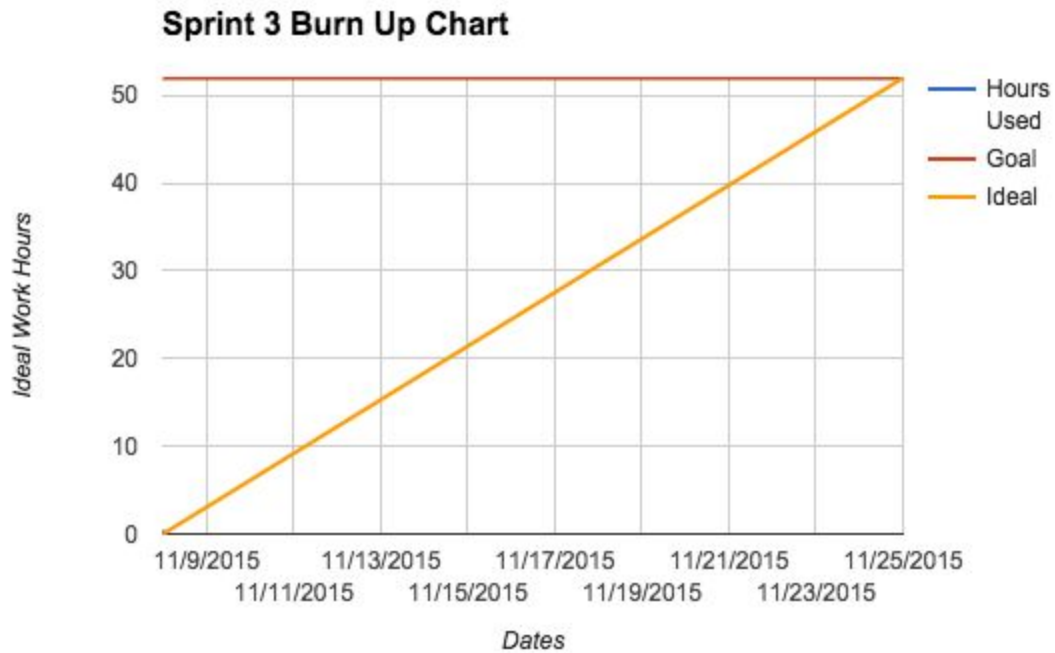

User Story 2, task 4

Ethan Vadai (Scrum Master):

User Story 3, task 1

User Story 3, task 2

Initial Burn Up Chart:

Scrum Board:

The Scrum Board is organized into four columns, each with a title and a list of items. The background of the board is a solid blue color.

- User Stories**
 - I as a user would like to be able to study a deck of flashcards in order to study for a class
 - I as a user would like to be able to search for users profiles and shared decks by name in order to find study material associated with a class I'm in.
 - I as a user would like to be able to copy someone else's public notes so I can modify them and study them myself.
 - Add a card...
- Tasks to do**
 - User story 1: On study mode click per deck, go to another page that will display a single card and have the ability to turn the card over
 - User story 1: Be able to move to the next/previous card of a deck that you are studying
 - User story 1: Be able to randomize the order that the cards appear
 - User story 2: Take the array returned and display a split page, top contains user's returned by the search and the bottom contains decks returned by the search.
 - User story 2: Create a public profile page where user's information (username, first and last name) is displayed and all their shared decks are displayed.
 - User story 2: Be able to click on a deck in order to study them (ie link user story 2 to user story 1)
 - User story 3: Grab the deck from the database and copy giving it a new
 - Add a card...
- Tasks in progress**
 - User story 2: Setup a search that checks for decks (that are shared) and users that match the search. Just return the array to the page.
 - Add a card...
- Tasks completed**
 - Add a card...
